Your guide to making and *keeping* New Year's resolutions. Includes advice on how to stick to five common resolutions: eating healthier, bonding with kids, reducing stress, working on health, and getting rid of clutter at home. Great tips on sticking to resolutions, with a focus on taking small steps to make a big change.

# January's News at cyberM·I·N·D·

***Do you need to speed up on-line?***

Has your internet browsing slowed to a snail's pace? cyberM·I·N·D· can help! In January cyberM·I·N·D· will be launching residential DSL internet access services.

DSL provides high speed internet over your existing phone line without interrupting your phone service. Finally, you can surf the web and talk on the phone simultaneously!

The new DSL connections will have a download speed of 1.5 MB per second and an upload speed of 384 K per second.

Ready for high speed internet access provided by a local company? Call Tim Kirk at cyberM·I·N·D· to get set up today, or visit our website at [www.cybermind-usa.net/dsl/index.html](http://www.cybermind-usa.net/dsl/index.html). You can check availability, pricing, and even order DSL on-line.

## Tim's Tips

### Adding a Special Character

There are probably one or two special characters that you use regularly (for example, ® and ©). It can be a real time-waster to open your Character Map every time you want to insert one of these symbols. So don't!

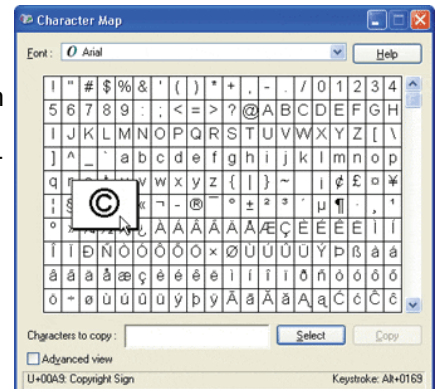

Open the Character Map by clicking Start, clicking **All Programs**, and then clicking **Accessories**.

Click **System Tools**, and then click **Character Map**.

Click the © symbol. Notice that the bottom-right corner of the Character Map shows the keyboard shortcut used to insert the special character. Write it

down for later use.

When you want to insert that character, here's the trick: Position the cursor where you want to insert the special character, then with NUM LOCK key on, hold down the ALT key and use the number pad keys to type the character value.
