Welcome to cyberCONNECTIONS!

Welcome to the May 2006 edition of cyberCONNECTIONS, the newsletter exclusively for cyberM·I·N·D·'s dial-up and DSL customers!

Winter is finally over and spring is officially here! Being outside enjoying the beautiful weather does not mean it's time to start neglecting your computer! In this issue of cyberCONNECTIONS, we will show you some of the many products cyberM·I·N·D· has to offer

to keep you and your equipment running properly and efficiently. Also, the Site of the Month section will be showcasing "Foremost Focal Beads", a website we recently launched.

cyberCONNECTIONS is our way of keeping you updated on new products and services at cyberM·I·N·D·, as well as steering you to some fun and informative web sites along the way.

Every facet of this newsletter is for your enjoyment. Please feel free to contact us with any feedback regarding cyberCONNECTIONS or cyberM·I·N·D·. You can e-mail us at: newsletter@cybermind.biz

Thank you again for all of your support and enjoy cyberCONNECTIONS!

May's News at cyberM·I·N·D·

With spring in full swing, thunderstorms will start rolling through the area knocking out power at the most inconvenient of times. A Uninterruptible Power Supply or UPS can easily solve this problem. A UPS can provide temporary battery power during outages and can even notify you via e-

mail of the power loss. If your power is not restored in a short time, a UPS is smart enough to safely power down your equipment to prevent data corruption and/or hardware failure. Once power is restored, a UPS will automatically turn the equipment back on and notify you via e-mail that the power has been restored. cyberM·I·N·D· is an Authorized Channel Partner for APC brand UPSs and offer a range of battery backups from economy models with

short battery power to higher end models with long term batter power.

With a UPS, you can have peace of mind knowing your equipment is protected from power outages and offer worry free protection while you are away from the office.

If you have any questions about the products that cyberM·I·N·D· offers, contact our friendly sales team and they would be happy to answer any questions or concerns!

Site of the Month: Foremost Focal Beads

The screenshot shows the homepage of the Foremost Focal Beads website. At the top, there's a large banner with the website's name "foremostfocal" in a stylized font, with "Focusing on your designs." below it. To the right of the banner is a close-up image of a purple, faceted focal bead. Below the banner, there's a navigation bar with links for "store", "your account", "search", "view cart", and "checkout". On the left side, there's a sidebar with links for "home", "focal bead info", "gallery", "featured artist", "who's that artist?", "order info", and "contact". Under "focal bead info", there are links for "Catalog", "Mother's Day", "What's new?", "Ceramic", "Glass", "Gemstone", "Polymer Clay", "Raku", and "Stone". A "Sign In" link is also in this sidebar. In the center, there's a "GRAND OPENING!" banner with a green star icon and the text "GRAND OPENING! Free gift with". Below this, there's a section titled "Welcome to Foremost Focal Beads" with a short description and four small images of different beads.

We are proud to announce the launch of the Foremost Focal Beads website, an online store for handmade beads. The beads featured are one-of-a-kind and can only be purchased through the Foremost Focal website. While browsing the beads, you can also check out tips for making jewelry with the particular bead you are viewing and information about the artist who created the work of art. Foremost Focal Beads is the perfect site for the creative individual.

Tim's Tips

Stretching the Taskbar

Sometimes your taskbar gets a little tight and cramped for room. When this happens, give it a stretch. First, unlock your taskbar by right-clicking the taskbar, and then clicking **Lock the Taskbar** if it is selected (this will un-select it). Scroll your mouse over the top edge of the taskbar until you see the vertical resize cursor (arrow pointing up and down). Click, hold and drag the top of the taskbar up. Isn't that better? Once you find a place where you like it, you should re-select **Lock the Taskbar**.
